PRESSURE EQUIPMENT

LP & HP Slurry Heat Exchangers

Fully Fabricated Shell & Tube Heat Exchangers

ISO 9001

BUREAU VERITAS
Certification

Shell & Tube Heat Exchangers, project-managed and quality certified from start to finish. Purpose-built carbon steel heat exchangers with Ni-clad tube sheets, Channel Heads & Bundles to tackle harsh Alumina industry conditions.

With 20+ years of international strategic sourcing experience, we are specialists in finding the right supply partner for critical new or replacement pressure equipment.

We take responsibility for the entire supply chain; ensuring supplier QA/QC, shipping and expediting, testing and MDR certification.

These heat exchangers were fabricated to the customer's strict detailed design requirements to ASME VIII Div 1 and FFF Australia managed design verification and registration to suit AS 1210-2010, resulting in another successful project delivery.

Get in touch with us to see how we can make you more successful, one order at a time.

International Strategic Sourcing Specialists giving all Australian businesses access to the global supply chain.
