REPLACEMENT S&T HEAT EXCHANGER BONNETS

Petrochemical S&T Heat Exchanger Bonnets

ISO 9001

BUREAU VERITAS
Certification

FFF Australia supply and monitor the fabrication and testing of the 3 Shell & Tube Heat Exchanger Channel Heads in accordance with the petrochemical refinery standards.

The S&T Heat Exchanger bonnets are for an AS1210 class 2A vessel. It was identified that the Channel bonnets required replacement due to corrosion. All material, fabrication, testing, and documentation was provided to satisfy AS1210 quality requirements.

The supply scope also involved, NDE – RT, MT, hardness testing, Post weld heat treatment & surface treatment suitable for in-situ insulation when installed.

“Client was extremely satisfied giving us 5 stars in our ISO feedback assessment and indicating that they would recommend FFF Australia.”
